

# Isolation Requirements – POSITIVE COVID CASE

## Fully Vaccinated - Symptom-Free

- **Isolate for 5 days after your COVID Test**
- **Self-assess**
- **Pre-return testing when available**

## Fully Vaccinated With Symptoms

- **Isolate for 5 days from the day that the symptoms started or the positive test whichever is later.**
- **After the 5 days, isolation can be lifted if there is no fever and symptoms have decreased.**
- **If you still have a fever after 5 days you will continue to isolate until the fever is gone and your other symptoms are improving for 24 hours**
- **Self-assess**
- **Pre-return testing when available**

## Not Fully Vaccinated

- **Isolate for 10 days from the day of the positive test**
- **Must continue to isolate until the fever is gone and all other symptoms have to be improving in the past 24 hours.**
- **Self-Assess**
- **Pre-return testing when available**
