

COVID-19 Information for Bus Drivers

INDIVIDUAL PREVENTION MEASURES:

Regular hand washing is still the best way to help prevent contracting the coronavirus. Wash your hands for 20 seconds with soap and water and dry thoroughly. It is especially important to clean your hands after coughing or sneezing, before/during/after you prepare food, before eating, after toilet use, when your hands are visibly dirty, and especially after cleaning your bus. Cover your mouth and nose when you cough or sneeze, or you can cough or sneeze into your sleeve.

BUS CLEANING PROCEDURES:

- Protect yourself and others by ensuring that you are wearing protective gloves whenever cleaning surfaces or objects.
- Sanitizing specific contact points daily. This includes:
 - Grab bars
 - Driver area and controls
 - Seat backs
 - Seat tops
 - Window areas
- Spray all surfaces with the product. Surfaces must remain wet for 10 minutes, then allow to air dry.
- No wiping is necessary.
- Wash your hands after cleaning any surface.

New information will be shared as it becomes available. If you have any questions, please contact Darren Cameron at dcameron@rrvsd.ca or Dave Funk at dfunk@rrvsd.ca .
